

K EVO Line

The new K EVO series consists of fireplaces, energy, fan heater, ecological, closed type with a ceramic glass door of high durability. It is produced in seven different models. The fireplace is constructed as one whole construction (monoblocco). The combustion space is made of cast iron, a material durable and efficient. The incineration chamber is absolutely air-tight. It includes two hot air outputs. It also carries out a secondary combustion (ecological). It has an automatic tamper-a patent of STARFIRE and it is certified with CE. The fireplace has a 7-year written warranty. It is a qualitative solution for any kind of space. The K EVO series can be cased with all STARFIRE'S cases.

Special characteristics

- Ergonomic handle
- Tamper of combustion air input regulation
- New door totally made of ceramic glass sliding upwards with silent operation (in model K EVO 80/80 DX-SX/100/120 Crystal)
- Adjustable in height feet
- Combustion chamber totally made of cast iron of high durability
- Cast iron grill and metal bucket for ash cleaning
- Cast iron with holes on the backside (ecological burning and more calories)
- Key for door opening and control of the tamper
- Adjustable chimney tamper
- Ceramic glass door of high durability (thermal shock 800c)
- Opening door (mainly for the glass cleaning)
- Certified CE
- Hot air exhaust duct (for the space we want to heat)
- Metal reel with safety for the door mechanism
- 7year written warranty

Automatic mechanism & adjustable tamper

With this new mechanism, a STARFIRE's patent, the fume's tamper operates automatically in on-off positions with the closing and the opening of the door and manually in two intermediate positions.

- ✓ Great combustion autonomy
- ✓ Small loss of energy
